PROJECTS

- Healthcare Website

Jul 2024 – Aug 2024

 - Developed a dynamic healthcare website with features like booking appointments with doctors, searching for doctors, and finding the nearest clinics using a secure backend with database integration to manage patient information and appointments.
 - Integrated responsive design and seamless user experience with personalized health recommendations, easy navigation, and optimized performance for different devices and screen sizes.
- Notes App

Feb 2024 – Mar 2024

 - Developed a dynamic notes app with features like adding, deleting, and editing notes using a secure backend with database integration to manage user notes and preferences.
 - Integrated responsive design and seamless user experience with personalized note categorization, search functionality, and optimized performance for different devices and screen sizes.
- Online Ticket Booking System

Feb 2023 – Mar 2023

 - Developed an online ticket booking system implementing efficient data structures and algorithms for seat allocation, availability tracking, and dynamic pricing.
 - Optimized the system’s performance by using advanced algorithms for search and sorting operations, reducing time complexity for handling large-scale bookings and minimizing customer wait times.
